

A decorative blue line graphic starts with a small circle at the top left, goes down vertically, then diagonally down and to the right to a larger circle, then horizontally to a small dot, then diagonally down and to the left to a small circle, and finally vertically down to a small circle.

working to reduce
CO₂ emissions through
cogeneration, is a great use
of our energy.

We've reduced annual CO₂ emissions by about 10.5 million metric tons from the combined capacity at the 100 cogeneration facilities in which we have an interest.
